1989 SUMMARY

OFFICE OF THE FIRE COMMISSIONER

The Office of the Fire Commissioner seeks to minimize the loss of life and property caused by fire throughout the Province, through the promotion of public education on fire prevention practices and enforcement of The Fire Prevention Act.

FUNCTIONS

The Fire Commissioner, under the direction of the Minister of Municipal and Provincial Affairs, is responsible for the administering of The Fire Prevention Act, which deals in part with the prevention of fires; the storage, sale and use of flammables and combustibles; the installation and maintenance of fire detection and alarm systems and fire suppression and extinguishing equipment; the construction, maintenance and regulation of fire escapes; and the means and adequacy of exits from buildings in case of fire. The Fire Prevention Act also deals with the review of plans for new construction, alteration, and repair of public buildings; the investigation of the cause, origin and circumstances of fire and the compilation of Provincial yearly fire statistics. The Office of the Fire Commissioner conducts a number of training programs involving Municipal Firefighting Training, Code Interpretation, Fire Prevention, Fire Investigation, and the Transportation of Dangerous Goods.

In administering the act, the Fire Commissioner and his staff:

- Evaluates Municipal Firefighting facilities and operations and advises Councils and Fire Chiefs on the overall fire protection status of their Municipalities:
- Prepares fire truck specifications and recommends units and equipment to be purchased by the Municipalities;
- Publicizes and promotes public life safety and fire prevention;

- Inspects public, commercial and industrial buildings and places of public assembly to ensure that fire and life safety regulations are adhered to;

- Regulates the number of persons allowed in public assembly buildings at any one time;

- Examines plans and specifications relative to construction, alteration and repair to determine that code requirements on fire protection and life safety are met to ensure the safety of the public;

- Evaluates all fire causes with a view towards preventing the reoccurrence of similar fires;

- Provides firefighter training to volunteer fire departments through a mobile firefighting training team;

- Prepares fire prevention and life safety guidelines for all types of building occupancies and for specific procedures;

- Renders technical services to Architects, Engineers and their associates in the design and construction of structures in relation to code requirements on safety and fire protection.

The total fire fatalities for 1989 indicates a decrease from the records of 1988 During 1989 this Province recorded 10 deaths by fire in 486 residential fires, with a dollar loss of $13,481,749.00. The decrease in lives lost over 1988 was two (2) with a dollar decrease of $5,936,089.51. The loss of nine (9) men and one (1) child is a grim reminder to all of us of the destructiveness of fire.

Cooking fat fires and careless cooking accounted for 91 of our fires involving $1,800,041.00 in fire loss. Defective or improperly installed and operated heating appliances caused 106 fires involving $1,893,530.00. Defective and overloaded electrical systems and appliances accounted for a dollar loss of $4,744,320.00 involving 109 fires. Careless smoking and children playing with matches and lighters caused 47 fires involving a fire loss of $897,380.00.

An aggressive public fire prevention program continued throughout 1989. It is strongly felt that the majority of the people of this Province are now very fire conscious. The objective of this office is to continue our program with the same emphasis during the years to come, and hopefully maintain the current interest and desire of our public to educate themselves in the prevention of fire and the preservation of life and property.

This past year the Office of the Fire Commissioner continued in its fire prevention work involving technical fire inspections of schools, hotels, motels, nursing homes, clubs, lounges, commercial and industrial and provincial government buildings. This was in addition to those structures in municipalities that were inspected by local Fire Departments.

To provide guidance to 305 organized fully paid and volunteer fire departments in our province, in matters pertaining to fire department administration, fire prevention and standardization of procedures, several of the 28 published Fire Commissioner's Bulletins were revised and updated. Meetings were held with Municipal Councils to discuss their fire department activities and overall fire protection within their Municipality.

To establish a direct line of communication between this office and all the organized fire departments, R.C.M.P. Detachments, Royal Newfoundland Constabulary and other government departments, the **"Fire-Com-News"** quarterly publication was published. This publication contains update information of firefighting, administration, policy, Fire Commissioner's rulings, code interpretations and information of a general nature.

The Fire Advisory Council, as referred to in The Fire Prevention Act met four times in 1989. The objective of the Council is to advise the Minister on any matters within the purview of the Act.

The Provincial Mobile Firefighting Training, under the direction of this office, provided firefighter training to 132 municipalities involving 627 firefighters for a total of 10,470 training man hours in a basic two (2) day firefighting course.

Advanced level firefighter training is conducted in accordance with the National Fire Protection Association Standard 1001 "Firefighter Professional Qualifications".

During the year a total of 4, 7 day 80 hour courses were conducted in accordance with this standard. These courses are one step of a seven step prescribed outline of study that lead the firefighters to certification in accordance with the standard.

Dangerous Goods Training was provided during the year for both emergency response personnel and municipal workers.

During the year twelve **12** emergency response seminars respecting dangerous goods were conducted throughout the province. Also **12** municipal workers seminars respecting dangerous goods were conducted at various locations throughout the province.

Fire prevention and fire inspection was addressed during the year through seminars conducted at various locations in the province. During the year four (4) seminars were conducted for the municipal fire departments.

During the year this office recommended, and the Department of Municipal and Provincial Affairs approved, the expenditure of $811,000.00 for municipal firefighting equipment within the Province on a 75/25 cost sharing basis.

This office updated standards on mobile firefighting apparatus for the Province thereby initiating a standardization program for future use and application.

The week of October 8-14, 1989, was observed in this Province, as well as throughout Canada as **"Fire Prevention Week"**. The majority of our Municipal Fire Departments throughout the Province participated. Some conducted very elaborate public education programs. This office assisted in the distribution to all fire chiefs special information and literature for use during Fire Prevention Week. Observance of Fire Prevention Week in this Province will continue as a means to further educate our public in fire prevention and life safety procedures. A special year round fire prevention contest was held within the Province, sponsored by this office. However, the format of this year was changed from previous years. Three plaques were awarded in the following order:

Division 1 - to include communities with a population up to 1000

Division 2 - to include communities with a population of 1000-5000

Division 3 - to include communities with a population of 5000 and over.

The successful winner for 1989 for Division 1 was the Town of Ramea, Division 2 the Town of Burin, and Division 3 the Town of Marystown.

CORRECTION: Last sentence on Page 4 - the winner for 1989 Fire Prevention Contest - Division 1, should read **The Local Service District of Francois**, not the Town of Ramea.

The Fire Commissioner and members of his staff had the honour to attend and address delegates attending the following conventions and/or meetings on fire protection matters: - Association of Canadian Fire Marshals and Fire Commissioners, Newfoundland and Labrador Association of Fire Chiefs and Firefighters, Municipal Fire Department functions and the Newfoundland Hotel/Motel Association. In addition, fire lectures, live demonstrations, addresses on fire related matters were presented to several Civic Organizations and Municipal Council.

Over fifty Municipal Fire Chiefs serve as Local Assistants to the Fire Commissioner, as appointed by the Minister of Municipal and Provincial Affairs under the Fire Prevention Act. Special guidelines have been written for the Local Assistants.

Assistance is rendered to the Police in the investigating of fires which may be considered to be of doubtful origin, as the members of these forces have the responsibility of investigating all fires occurring within their jurisdiction. Assistance is also given by this office when required and to the members of the St. John's Fire Department. The assigned Special Assistant to the Fire Commissioner on Fire Investigation is available on call to both Police forces and the St. John's Fire Department.

In conclusion, we wish to acknowledge the assistance given to this office by all the appointed Local Assistants to the Fire Commissioner, the St. John's, Corner Brook and Stephenville Fire Departments, the Royal Newfoundland Constabulary, the Newfoundland and Labrador Association of Fire Chiefs and Firefighters, the Federation of Municipalities, the Royal Canadian Mounted Police, all the organized volunteer fire departments throughout the Province, all Municipal Councils, Insurance Adjusters, Investigators, Radio, Television and all the Government Departments and agencies without whose help many of the job accomplishments of this office could not have been attended to.

Finally, this office wishes to thank the general public of our Province who have shown such a great interest in our overall Fire Prevention Program and who have willingly participated in our fire safety activities. The concept of **"Total Involvement"** must always be the keynote of success in our combined effort to drastically reduce our fire deaths and injuries and fire losses . The office officially adopted the fire prevention slogan from the National Fire Protection Association titles - **"LEARN NOT TO BURN"** in 1980, and strives to maintain its meaning.
